With CAD2VR®, you can easily explore your CAD models together in VR. Save on travel costs and invite your customers and staff across different locations to join VR meetings. Check ergonomics, identify errors at an early stage and discuss your designs efficiently in a virtual environment.

CAD2VR® is designed for simple and secure use. Use the standalone version for Meta Quest to enjoy wireless freedom and maximum flexibility. With the Windows version, you can use your PC's processing power for large CAD models. A desktop mode is available for participants without a headset.
